Sand Sample Report

Please fill out this form in its entirety to help us understand your footing needs. We'll need 2 cups of your new or existing sand. To provide a good representation of all the particle sizes in your existing arena, mix a sample area all the way down to the base. Take a sample from the mixed area. Small sand particles tend to fall to the base while larger particles tend to be on the top.

Mail form and sample to: Premier Equestrian
8915 S. 700 E. • Suite 102
Sandy, UT 84070
